Subject: Superfund Cleanup Needs to be Upgraded

Dear Administrator Gina McCarthy,

The EPA's draft plan for the Portland Harbor Superfund Site cleanup leaves 85% of the lead, PCBs, DDT, mercury, arsenic and other contaminants in the area with no means of removal. It doesn't set a clear goal for lifting fish consumption advisories. It doesn't hold local industrial polluters accountable in any way. It doesn't remove the disposal facility that would pollute the river with toxic waste.

These issues should all be addressed in the plan. The people of Portland deserve a cleaner, non-toxic river. Thank you.

Sincerely,

(b) (6)

Portland, OR 97217
